

LIVEO-BT TX

BT Multipoint Transmitter for Liveo BT Speakers

HELVIN's new LIVEO BT represents the perfect combination of simplicity, elegance and ease of installation. Thanks to the innovative Bluetooth wireless technology contained in this small transmitter, it is now possible to manage a higher number of LIVEO BT speakers compared to the only two allowed until now by normal Bluetooth technology; the only limit is 25-30m distance from the transmitter and that's it. It is then possible to make a small-to-medium-sized audio system even without any low-impedance connection or constant voltage line; just make sure that mains power is available. The LIVEO BT TX is built to allow quick system setup, and its compact and lightweight design allows for wall mounting or desktop use.

PRODUCT DETAILS

Key features

Multi-Point BT connection with 16 system ID
